

## **Healed From A Digestive System Problem**

"After many tests to find the cause of the problem with my digestive system, one test came up positive alerting us to the likelihood of bowel cancer. More detailed tests were made and they both came up negative. In between both tests my church family and friends were praying for me and when I went to get the result of the last test I had such peace as I had just left it in my Lord's hands. Praise His name!"
