

Healing Intervention

"In 1995 my GP informed me that I had a very slight heart murmur, (leaking heart valve) and may need an operation in 10 or 12 years time. I thought no more about it until I had another checkup in 1997 and now my GP told me it was now "quite severe". Would most likely require open heart surgery. On the day of my Dr's diagnosis I had a friend with me who prayed for divine intervention & healing in Jesus' wonderful name; and God answered my friend's prayer because I felt the power of the Holy Spirit on me, especially around my chest; and after my first visit to the heart specialist, some extensive examination and an ultra-sound, the heart specialist said it's not near as bad as your GP thinks - there will be no need for an operation just yet. Thank God forever more! I had to have it checked again in 6 months, then 12 months, then 12 months again. But it remains unchanged and stable and the specialist is literally amazed. I know one day soon the Lord will completely restore it to brand new which will be better than any plastic heart valve. I thank my God every day for keeping me from the trauma and such of quite a serious operation. Thank you Jesus!"
