

Penny's Foot

Hi Peter,

We forgot to mention. You called up someone last Sunday with a foot problem which you described on their right foot. Penny had been having trouble with pain in her right foot (not the left one that had the two Achilles operations). She told me before we left home on Sunday that you would be prompted to call her forward for the pain. As soon as you mentioned it we both looked at each other and nodded and she went forward. The pain had disappeared by the end of the service and hasn't come back. Praise God and your faithful open heart. See you in the morning.

Kind Regards,

Bob A
